

# TOWARDS A RESOURCE EFFICIENT INDUSTRY

Did you know that rehabilitated gypsum quarries generate diversified biotopes for rare species of amphibians, insects, birds, flowers and plants ?

**26MT  
NATURAL**

Did you know that FGD gypsum comes from the Flue Gas Desulphurisation process of the power station industry ?

## GTOG PROJECT

The Gypsum Industry, Gypsum recyclers, demolition companies and universities - in total 17 partners- are engaged on the project **Life+** starting in January 2013 for a period of three years ending in December 2015. This project is an incentive to recycle more. Its innovation lies in considering the supply chain (demolishers, recyclers, manufacturers) to create a recycling and resource efficient economy.
